

Table 5F.1.1.3: Morbidity Burden for Injury/Poisoning Events¹, Active Category, US Armed Forces, 2012-2017

Hospitalization & Ambulatory	Year					
	2012	2013	2014	2015	2016	2017
Service Members Treated [2]	600,006	596,506	578,351	550,283	550,213	538,945
Total Encounters [3]	2,203,706	2,152,394	2,106,494	2,134,133	2,755,387	2,775,393
Rank Among All-cause Diagnoses [4]	1	1	1	1	1	1
Hospital Bed Days	68,337	47,790	40,254	41,504	43,738	39,512
Lost Work Days	NA	288,551	255,925	NA	NA	NA
Share Total Encounters	20.8%	20.7%	20.8%	21.2%	24.8%	24.9%
Share Total Hospital Bed Days	NA	11.9%	11.1%	12.0%	12.4%	11.8%
Share Lost Work Time	NA	24.3%	23.9%	NA	NA	NA
Coding Basis	ICD-9-CM	ICD-9-CM	ICD-9-CM	ICD-9-CM/ ICD-10-CM	ICD-10-CM	ICD-10-CM

(1) Burden of disease major categories and burden of disease-related conditions based on a modified version of those defined in the Global Burden of Disease Study (Source: The global burden of disease: a comprehensive assessment of mortality and disability from diseases, injuries, and risk factors in 1990 and projected to 2020. Murray CJ, Lopez AD, eds. Harvard School of Public Health (on behalf of the World Health Organization and The World Bank), 1996:120–122.

(2) Individuals with at least one hospitalization or ambulatory visit for the condition; not unique individuals in total.

(3) Medical encounters: total hospitalizations and ambulatory visits for the condition (with no more than one encounter per individual per day per condition)

(4) Rank based on 142 burden of disease-related disease conditions; for hospital bed days, tied values were given the same ranking, which resulted in a highest rank of 128

(5) Total hospitalizations and rate of hospitalization values changed across the reporting years when three (alternate) years were reported. Figures shown are based on the most recent summary reports included in multi-year tables rather than the primary reporting year summary.
