Table 1.8.2: Lost Work Days Due to Major Health Conditions by Gender and Age for Persons Aged 18 and Over, United States 2015

* Does not meet standards for reliability.
[1] A missed work day is defined as absence from work due to illness or injury in the past 12 months, excluding maternity or family leave.
[2] Respondents response when asked "About how many days did miss work at a job or business because of illness or injury (do not include maternity leave)?
[3] Respondent reported "Fracture/bone/joint injury; Back/neck problem; Arthritis/Rheumatism; Amputated limb/finger/digit; or Musculoskeletal /connective tissue problem." Bed days may be caused by any condition.
[4] Respondent reported "heart problem, stroke, hypertension, or circulation issue." Bed days may be caused by any condition.
[5] Respondent reported "diabetes." Bed days may be caused by any condition.
[6] Respondent reported "emphysema, chronic obstructive pulmonary disease, chronic asthma, hay fever, sinusitis, or chronic bronchitis." Bed days may be caused by any condition.
[7] Respondent reported "feelings that interfere with life and activities in past 30 days: sad, nervous, restless, hopelessness, worthlessness, depression, general anxiety, or living is an effort." Bed days may be caused by any condition.
[8] Respondent reported "any kind of cancer." Bed days may be caused by any condition.
